3. Contact / Contact persons 6

The effects of the Covid 19 pandemic will be felt by all of us for a long time to come; as organizers, we are pleased to be able to hold our event again together with you in compliance with the current hygiene and safety measures.

When holding an event, our priority is the well-being of everyone involved. Together with the RheinMain CongressCenter (RMCC), we have therefore developed a concept that considers organizational, hygienic and medical measures. The top priority is the safety and health of all exhibitors, visitors, conference participants, service partners and employees.

This leaflet is based on the current requirements of the Hessian state from May 26, 2022. We recommend that all exhibitors consider the specifications as a minimum requirement as part of their participation in the trade fair.

As the entire situation is still developing dynamically, the prescribed hygiene and safety measures may change by the time of the event.
1. General hygiene recommendations

1.1 Compliance with current hygiene and safety measures

The applicable behavioral and hygienic measures are pointed out on the event premises.

With these measures, all participants can help to protect themselves and others from infection:

- The current recommendations of the Robert Koch Institute (RKI) on hygiene must be observed
- Wash and disinfect hands regularly. Hand disinfection dispensers are distributed in sufficient numbers on the premises
- In case of symptoms of illness, please stay at home
- Avoid touching and greeting with handshakes
- Keep hands away from face
- Coughing or sneezing into one’s elbow
- Additionally, we recommend using the free Corona warn app. It supports faster tracking and breaking of infection chains.

1. General hygiene recommendations

1.2 Social distancing rules
With the elimination of a large number of mandated infection control measures in everyday life, each person's own responsible actions take on even greater importance.

Behave in such a way that you do not expose yourself or others to any unreasonable risk of infection.

Exercise particular caution in personal encounters with people who are at increased risk for severe disease progression if infected with coronavirus.

If possible, avoid personal encounters with members of other households in the event of acute respiratory symptoms until the causes have been clarified.

We as organizers recommend a precautionary testing!

1.3 Wearing of face masks
There is no general obligation to wear face masks indoors.

Take into account the general recommendations on hygiene and the wearing of a medical mask, especially indoors and in crowded situations, on your own responsibility and as appropriate to the situation.

We as organizers recommend wearing a mask.

These masks are permitted: surgical masks or protective masks of the standards FFP2, KN95, N95 or comparable without exhalation valve.
2. Exclusion from attending the event

Unfortunately, the following individuals are excluded from attending the event:

- Individuals **without valid proof of vaccination or convalescence** respectively without negative proof according to § 3 CoSchuV.
- Individuals who have been in a **risk area designated by the RKI** during the past 14 days.
- Individuals diagnosed with **COVID-19 infection** in the past 14 days or who have had contact with a confirmed COVID-19 patient.
- Individuals currently suffering from the following symptoms: **Cough, cold, sore throat, fever, headache, pain in limbs, loss of sense of smell and taste.**
